

Digital Toolkits

The Hollie Gazzard Trust is proud to extend its highly regarded training programmes with a new offering!

Our **digital toolkits** are designed with bite-sized, 30-minute learning in mind. The toolkits offer organisations a flexible and accessible way to strengthen staff awareness and safety - particularly valuable for busy teams who may struggle to attend training at the same time.

These toolkits complement our in-person training, offering a different learning style and additional supporting materials, so organisations can embed learning continuously and at scale, with longer workshops available for teams who wish to explore the topics in greater depth.

Available Toolkits:

Stalking Awareness

Builds understanding of stalking behaviours, warning signs, impacts, and safe responses.

Lone Working

Supports organisations in protecting staff who work alone, covering risk awareness and personal safety

Coercive and Controlling Behaviour Awareness

Helps learners recognise patterns of coercive control, understand its dynamics, and respond appropriately.

Sexual Harassment Awareness

Raises awareness of sexual harassment in the workplace, including prevention, reporting pathways, and organisational responsibilities.

Why Choose the Hollie Gazzard Trust Digital Toolkits?

- Ideal for organisations with limited training time or dispersed teams
- Reinforces a culture of safety and awareness
- Provides consistent, high-quality learning aligned with our trusted expertise
- Supports compliance, safeguarding, and staff wellbeing initiatives

Bringing Learning to Everyone

These digital toolkits make it easier than ever for organisations to prioritise safety, awareness, and prevention. Whether used as standalone resources or alongside our full training programmes, they offer a powerful way to keep teams informed, confident, and protected.
